

## ENHANCED HEALTH MEASURES

Here are some of the steps we are taking to provide a safer environment for our customers and employees.

- We will be checking and logging the temperature of every employee at the beginning of every shift
- Handwashing, handwashing, handwashing
- We are deep cleaning our kitchen nightly and sanitizing all surfaces
- We continue sanitizing kitchen and front of house surfaces throughout the day
- We are including a "housemade" alcohol wipe with all orders

### Take Out

We have created a "no contact" pick up experience for our customers. Some of these measures include:

- Automatic/No Touch paper towel dispenser at the front door for guests to use on the door handle
- We have created a large open space in the restaurant so multiple guests can observe social distancing
- The only people we allow behind the open pick up area are our small group of employees. Our restrooms are closed to the public
- We provide a sanitized pen to each guest for check signing
- An automatic hand sanitizer dispenser is installed by door for use when leaving the restaurant

### Curbside Pickup

We will bring your food to your car and present check for signature on a sanitized clipboard with a sanitized pen.
